

VEGGI-WASH

FRUIT TOO...

Before

It's use with organically grown produce

Veggi-Wash was originally formulated to remove pesticides from the surface of fresh fruit and vegetables, but during product efficacy testing it was observed that a number of extra benefits could be attributed to the patented solution.

- 1. Veggi-Wash** is excellent at **reducing surface microbial loadings**. Irrigation and rain water can carry high levels of bacterial contamination.
- 2. Veggi-Wash** rapidly **dislodges insects** and helps float them away. Organically grown produce can be prone to insect contamination.
- 3. Veggi-Wash** is good at **removing surface grime**. Organically grown produce is moved from farm to store and can be exposed to associated pollution from petrol and diesel exhaust and the dusty atmosphere.
- 4. Veggi-Wash** is a **superb cleaner**. Produce is handled many times. Picking, packing, storage, shop displays, they all contribute to potential contamination.

Therefore even the most carefully grown organic produce could do with a little hygienic help: **'Veggi-Wash'** It is all the help you need. Cleaner, safer fruit and vegetables that last longer too.

After

DON'T JUST WASH IT - 'VEGGI-WASH' IT

It's a simply natural idea.
You wash your hands with soap
You clean your teeth with toothpaste
You wash your hair with shampoo

Why not wash your food?

Well now you can with - **'VEGGI-WASH'**. It has been specifically formulated to wash fresh fruit and vegetables.

'VEGGI-WASH' reaches areas where water cannot - it removes farm chemicals, waxes, dirt, diesel exhaust deposits and also insects.

Even if you buy organic or use home grown produce it is still exposed to grime and unwanted residues.

You need help - 'VEGGI-WASH'

Use it on apples to take away that waxy look, potatoes, spinach, lettuce and all leafy greens, broccoli, grapes and strawberries will all look brighter, cleaner and taste better too. **'VEGGI-WASH'** rinses totally away - you get the true flavour and goodness nature intended.

No taste - no smell - just safe.

Available as a concentrated solution or a ready to use refillable spray.

Buy now whilst pesticide shocks last.

How does 'VEGGI-WASH' work?

There are three naturally based surface active ingredients that do different jobs.

The first works on the surface of the vegetables, reducing the surface tension of the water to help it float away any farm contaminants or environmental pollution.

The second encapsulates the undesirables and holds them in the solution preventing them from redepositing on the vegetables or fruit.

The third starts to break down those toxic deposits and aids the final rinsing after the **'VEGGI-WASH'** safety cycle.

They are all vegetable derived materials so it's like washing your fruit and vegetables with vegetables and fruit.

'VEGGI-WASH' will change your outlook on washing food - naturally.
